

Dear Colleagues,

I'd like to announce that the 4th in the regular series of Australian workshops on SKA simulations will be held at the ATNF headquarters in Marsfield, Sydney, Australia on 11th July 2005. The date was chosen to join the [4th e-VLBI workshop](#) and allow the participants from outside Sydney to attend both workshops in the same trip.

The purpose of the meeting is to discuss an outcome of the [SKA Workshop on Wide-Field Imaging](#) which will take place soon in The Netherlands and share the new information resulted from it within the Australian SKA community. In addition, it is a great chance for Australians working in the field to present their latest work and discuss current issues. The meeting will include a number of talks (e.g., 15 min each) and time for discussions. The attendees of the ASTRON meeting are encouraged to attend this half-day workshop as well and give a talk with a significant review part to inspire the discussions.

The workshop is open to everybody interested in different aspects of interferometry simulations (not necessarily SKA related). Although it is mainly aimed at the Australian SKA community if anyone from overseas is interested or able to attend, they would be most welcome.

Please let me know by July 2 if you wish to attend. If you have an intention to give a talk, please indicate it. If you have any other questions, e.g. questions regarding travel or accommodation, please let me know.

Best regards,

Maxim Voronkov Maxim.Voronkov@csiro.au
