

Instructions for watching Science Assessment Workshop live

People can connect to the server by browsing to <https://polyrss.skatelescope.org>. When you connect, you will get an SSL warning about the certificate being invalid because it is self-signed. You should add an exception (in Firefox) or select "Continue to this website" on Internet Explorer.

The web site address above will connect to the streaming portal. To watch the live stream, go to "Live Streaming" on the left, and then click on whichever of the two available bandwidths you require (1024k or 128k).

You will need Microsoft Silverlight working to view the stream.

For Mac users:

1. Get and install the latest version of Microsoft Silverlight from <http://www.microsoft.com/silverlight/>
2. Ensure that your web browser is set to allow popups
3. If using firefox, ensure that silverlight is *enabled* by going to Tools -> Add-ons, then clicking on "Plugins" on the left, and check that "Silverlight Plug-In" is installed and enabled.

Now you can browse to the web streaming server (<https://polyrss.skatelescope.org>) and follow the links to the stream.

Enjoy !
